

Portable SD Card Speaker with FM Radio

This portable speaker system plays digital music files from SD cards. It also has an FM radio tuner and integrated speakers.

Product Overview

Compact Portable Audio Solution

The BM-110 is a versatile portable speaker system designed for high-quality audio playback in a compact form factor. It features a built-in FM radio tuner and supports direct playback of digital music files via an SD card slot. Ideal for personal use, this device offers both home and on-the-go functionality through its integrated internal power source.
