

Portable Solar Panel Charger for Electronic Devices

This portable solar panel charger offers a convenient and eco-friendly solution for charging various electronic devices. It efficiently converts sunlight into electricity and includes multiple adapters for broad compatibility with mobile phones, smartphones, and other portable electronics.

Product Overview

Sustainable Power Anywhere

This portable solar panel charger provides a convenient and eco-friendly solution for charging various electronic devices. By efficiently converting sunlight into electricity, it offers a reliable and sustainable power source for outdoor activities, travel, and emergency situations. The system includes multiple adapter cables, ensuring broad compatibility with mobile phones, smartphones, and other portable electronics.

Technical Details

Compatible Devices

- Mobile phones
- Smartphones
- Portable electronics

Design Features

Portable, Eco-friendly, Durable Frame

Frame Color

White

Connection Type

Black cable with multiple adapters
