

Portable Solar Power Generator

This compact and lightweight solar power generator is designed for portable use. It features an integrated solar panel for charging and multiple output ports, making it ideal for camping, emergencies, and off-grid power needs.

Overview

Portable Solar Power Solution

This compact and lightweight solar power generator is engineered for versatile off-grid energy needs. It features an integrated solar panel for efficient charging and provides a reliable power source for camping, outdoor activities, and emergency backup situations. Designed for maximum portability, it ensures essential devices stay powered regardless of your location.

Technical Specifications

Key Features

- Integrated solar panel charging
- Built-in battery storage
- Lightweight, portable design
- Multiple output port support

Supported Output Ports	USB, DC, AC
------------------------	-------------

Usage Scenarios

Best For

Camping • Emergency Backup • Off-Grid Power
