Product Overview

Compact Portable Performance

This portable 12V DC tire inflator is designed for reliability and ease of use in automotive emergencies or routine maintenance. With a robust 35L/min airflow capacity and an integrated 4-piece LED lighting system, it provides high-visibility performance in low-light conditions. Its lightweight design and built-in cable management make it a practical solution for car owners, cyclists, and professionals needing an on-the-go air solution.

Technical Specifications

Power & Input

12 V DC
Input Voltage

120 W
Power Rating

Performance

35 L/min
Flow Rate

100 PSI
Maximum Pressure

Physical Attributes

Weights and Measures

Metric	Value
Unit Weight	1.25 KG
Cylinder Diameter	30 mm
Power Cord Length	3 meters

Built-in Features

LED Lighting, Digital/Metal Gauge, Cord Storage, Hose Storage

Logistics

Packaging Details

- Units per carton: 8
- Carton dimensions: 56.5 x 25 x 39.5 cm
- Gross weight per carton: 12 KG
- Net weight per carton: 11 KG
- 20ft container capacity: 4000 pcs
