

Portable Travel WiFi Router with LAN Port

This compact WiFi router is designed for travel and on-the-go connectivity. It features a LAN port for wired connections and can create a personal hotspot from an existing wired network.

Product Overview

Compact Connectivity Solution

This portable travel WiFi router is engineered for professionals who require reliable internet access while on the move. Its compact design allows it to easily fit into travel bags, while the integrated LAN port enables seamless wired connections. Ideal for transforming wired network infrastructure into a secure, private personal hotspot in hotels, offices, or remote locations.
