Product Overview

Professional UV-C Surface Sterilization

This portable handheld UV-C surface sterilizer is designed to effectively eliminate up to 99.99% of germs, viruses, and bacteria, including MRSA and H1N1, within seconds. Featuring a built-in timer with an LCD display and a safety lock mechanism, it offers a secure and convenient way to sanitize various surfaces such as electronics, kitchenware, and personal items. Its lightweight, battery-operated design ensures reliable performance for home, office, or on-the-go sanitation needs.

Performance Specifications

Performance Metrics

2500 W/cm²

Irradiation Intensity

4.5 W

Power Consumption

254 nm

Peak Wavelength

Technical Details

Tube Life	28000 hrs
Dimensions	300 x 42 x 37 mm
Weight	157 g

Operational Conditions

Temperature Range	0-50°C
Relative Humidity	10-75% RH

Safety & Features

Key Features

- Built-in safety tilt sensor
- Integrated LCD timer
- Portable handheld design
- Effective against dust mites and flea eggs

Safety Certifications

CE
