

Portable Welding Screen with Flame Retardant Curtains

This portable welding screen creates a safe and contained area for welding. It features a sturdy frame with swivel casters for mobility and flame-retardant curtains that absorb UV radiation and sparks.

Product Overview

Industrial Welding Safety Solution

This portable welding screen is designed to create a safe, contained environment for welding operations in industrial settings. Featuring a robust, mobile frame with swivel casters, it allows for easy positioning to protect nearby workers and equipment from harmful UV radiation and flying sparks. The durable, flame-retardant curtains are available in a variety of colors to meet specific visibility and application requirements.

Key Features

Safety Capabilities	Flame Retardant, UV Radiation Protection, Spark Containment
Mobility	Yes
