Product Overview

Reliable Voltage Stabilization

This power frequency voltage stabilizer is engineered to protect sensitive equipment by mitigating unstable voltage fluctuations. Suitable for both 50Hz and 60Hz power systems, it ensures consistent and reliable power delivery for home appliances and industrial applications. With robust construction and efficient thermal management, this unit provides a dependable solution for environments with inconsistent electrical supply.

Technical Specifications

Transformer Material	100% Aluminum (Available in EI or Toroidal configurations)
Monthly Production Capacity	20000 pcs
Production Lead Time	25-30 days

Compliance & Standards

Available Documentation

- Testing Report
- Form A
- Certificate of Origin (C/O)

Certifications	CE, ISO 9001, SONCAP
----------------	----------------------

Trade Information

Loading Ports

- Xiaolan port (Zhongshan)
- Nansha port

Payment Terms	T/T, 30% deposit and 70% balance before shipment
OEM Availability	Available for orders over 500 pcs/capacity
