

# Power Tool Backing Pad

This backing pad is designed for use with power tools, providing a cushioned surface for attaching polishing pads and abrasive discs. Constructed from durable plastic and rubber, it ensures long-lasting performance and minimizes vibration during sanding, grinding, and polishing.

## ADDITIONAL IMAGES

## Overview

### Professional Grade Backing Pads

These high-quality backing pads are engineered for versatile use with various power tools, providing a cushioned and flexible interface for abrasive discs and polishing accessories. Constructed from durable plastic and rubber, they ensure reliable performance and resistance to wear during demanding sanding, grinding, and polishing applications. Designed for stability and control, these pads help minimize vibration, maximizing user comfort and efficiency on the job.

## Technical Specifications

### Available Diameters

- 100mm (4")
- 115mm (4.5")
- 125mm (5")
- 150mm (6")
- 180mm (7")

### Size and Thread Compatibility

Diameter	Compatible Threads
100mm (4")	M10x1.25, M10x1.5, M14x2
115mm (4.5")	M10x1.25, M10x1.5, M14x2, 5/8"-11NC
125mm (5")	M14x2, 5/8"-11NC
150mm (6")	M14x2, 5/8"-11NC, M16x2
180mm (7")	M14x2, 5/8"-11NC, M16x2

<b>Supported Thread Sizes</b>	M10x1.25, M10x1.5, M14x2, M16x2, 5/8"-11NC
<b>Material</b>	Plastic and Rubber

## Applications

### Primary Applications

Grinding • Polishing • Sanding • Surface Preparation
