

Power Tool Replacement Lithium Battery

This replacement lithium battery is designed for power tools. It features a robust construction with a secure locking mechanism for stable attachment to compatible devices, ensuring durability and reliable power delivery.

Overview

High-Performance Replacement Power

This 18V replacement lithium battery is engineered for demanding professional power tools. Featuring an imported high-quality lithium core, it provides consistent and strong power delivery for cordless equipment. Designed for durability and stability, it ensures reliable performance for everyday tasks like drilling and sawing.

Technical Specifications

Rated Voltage	18 V
Battery Chemistry	Lithium-ion

Features

Key Advantages

- Imported high-quality lithium core
- High power output
- Secure locking mechanism
- Robust housing for durability

Compatible Tool Types	Cordless Drills, Power Saws
