

Pre-Punched Sanding Sheet for Power Sanders

This sanding sheet features pre-punched holes for dust extraction. It is designed for use with power sanders and provides a consistent finish on wood, metal, and plastic.

Product Overview

Versatile Abrasive Solution

These pre-punched sanding sheets are specifically engineered for use with power sanders to ensure efficient material removal. The integrated hole pattern facilitates effective dust extraction, promoting a cleaner workspace and consistent finish. Designed to handle a variety of materials including wood, metal, and plastic, these sheets offer the durability and longevity required for professional applications.

Performance Features

Compatible Materials	Wood, Metal, Plastic
Dust Extraction	Yes
Primary Application	Power Sanding
