

Pre-Shaving Gear Hob

This precision-engineered gear hob is designed for pre-shaving operations. Constructed from high-speed steel, it ensures efficient material removal and superior surface finish.

Product Overview

Precision Gear Machining

This pre-shaving gear hob is engineered for high-precision material removal, facilitating superior surface finishes and accurate gear profiles. Built for efficiency in industrial machining, it utilizes advanced flute geometry to optimize chip evacuation and reduce cutting forces. It is a versatile tool suitable for processing a wide range of materials including steel, aluminum, and brass.

Technical Specifications

Precision Grade

AA • A

Module Range

m0.5 – 12

Compliance Standards

DIN 3968, ANSI B94.7, JIS B4354, GB/T 6084

Profile Details

Available Profiles

- Topping
- Protuberance
- Semi-topping
- Full-radius
