

Precision Alloy Compass Set

Precision compass set crafted from durable alloy for accurate circle creation. Features adjustable arms for radius customization and a secure locking mechanism to maintain precise settings during use.

Product Overview

Professional Precision Drawing

This precision alloy compass set is engineered for high-accuracy circle drawing and precise measurements in technical environments. Crafted from durable alloy, the tools ensure long-lasting stability for frequent drafting or geometry tasks. Designed with adjustable arms and a secure locking mechanism, it provides consistent results for both professional designers and students.

Technical Features

Material	Durable Alloy
Adjustment Type	Adjustable Arms, Secure Locking Mechanism

Application

Suitable Applications

- Technical Drawing
- Drafting
- Geometry Applications
- Measurement
