Precision Analysis Instrument

This is a precision instrument designed for analytical measurements. It features a digital display for easy reading of data and intuitive controls for adjustments.

Product Overview

Precision Analytical Control

This precision analysis instrument is engineered for high-accuracy measurements in experimental and analytical environments. Featuring an intuitive digital interface and streamlined controls, it allows for easy data monitoring and rapid adjustments. Its compact, versatile design ensures seamless integration into a wide variety of laboratory and industrial setups.

Technical Specifications

Interface Controls

- Digital Display
- Set Button
- Calibration (CAL) Button
- Enter (ENT) Button

Device Type	PH/ORP Controller
Design Features	Compact, Digital Display, Intuitive Controls
