

Precision CNC Lathe

This precision CNC lathe is designed for machining metal and other materials with high accuracy. It features a robust construction, a programmable control system, and a variety of cutting tools for turning, facing, threading, and other operations.

Overview

Professional Precision Machining

The CK6130 is a high-accuracy CNC lathe engineered for complex metalworking tasks including turning, facing, and threading. Built with a robust frame, this machine integrates advanced programmable controls and digital monitoring for consistent production quality. Comprehensive safety guarding ensures a secure work environment, making it an ideal choice for precise manufacturing applications.

Technical Specifications

Machining Operations

- Turning
- Facing
- Threading
