

Precision CNC Machine Tool

This precision engineered machine tool is designed for high-accuracy machining operations. It features an advanced CNC control system and a versatile worktable.

Overview

Precision CNC Machine Tool

The SGT6020SD is a precision-engineered machine tool designed for high-accuracy machining operations. Featuring a robust frame for stability and an advanced CNC control system, it is built for automated, efficient material removal and intricate detailing. This versatile machine is ideal for manufacturing complex components in demanding industries such as aerospace, automotive, and mold making.

Technical Specifications

Capabilities

- High-accuracy machining
- Automated processes
- Intricate detailing
- Efficient material removal

Model Number	SGT6020SD
Key Features	High-Speed Spindle, Automated Tool Changer, Robust Frame, Advanced CNC Control

Applications

Suitable Industries

Aerospace • Automotive • Mold Making
