

Precision Cutting Plotter for Vinyl and Cardstock

This cutting plotter is designed for cutting materials like vinyl, paper, and cardstock with precision. It offers stable and accurate cutting performance for applications like sign making and graphic design.

Overview

Professional Precision Cutting

The WK800 is a versatile, high-precision cutting plotter engineered for professional sign making and graphic design applications. It offers stable performance on a wide range of materials, including vinyl, paper, and cardstock, ensuring clean and accurate results. With an intuitive control panel and adjustable settings for speed and pressure, this machine provides the reliability required for demanding production workflows.

Technical Specifications

Operational Features

- Robust construction for stable performance
- Adjustable cutting speed settings
- Variable pressure controls
- User-friendly control interface

Compatible Materials

Vinyl, Paper, Cardstock

Applications

Typical Applications

Sign Making • Graphic Design • Precision Cutting
