

Precision Dial Indicator 0-10 mm Range 0.01 mm Resolution

This precision dial indicator accurately measures small distances and variations. It features a clear dial with 0.01mm resolution and a range of 0-10mm.

Product Overview

Precision Measurement Capabilities

This precision dial indicator is engineered for the accurate measurement of small distances and dimensional variations. Featuring a clear, high-contrast dial, it provides reliable readings essential for machining, manufacturing, and quality control environments. Its robust design ensures consistent dimensional control and alignment for demanding industrial applications.

Key Specifications

Core Metrics

10 mm

Max Range

0.01 mm

Resolution

Model Variants

Model Range Table

Article Number	Range	Graduation
DG02-1011	0-3mm	0.01mm
DG02-1021	0-5mm	0.01mm
DG02-1031	0-10mm	0.01mm
DG02-1041	0-20mm	0.01mm
DG02-1051	0-30mm	0.01mm
DG02-1061	0-50mm	0.01mm

Product Features

Ideal Applications

Machining, Manufacturing, Quality Control, Dimensional Inspection
