

Precision Diamond File Set

This set of precision diamond files is designed for intricate shaping, sharpening, and deburring tasks. The files feature a durable diamond coating for efficient material removal on hard materials, and each file has a color-coded handle for enhanced grip and control.

Product Overview

Precision Diamond File Set

This precision diamond file set is engineered for intricate shaping, sharpening, and deburring tasks. Featuring a durable diamond coating, these files offer efficient material removal on hard surfaces such as hardened steel, ceramics, and glass. The set includes a variety of file shapes to accommodate diverse workpiece geometries, ensuring versatility for model making, jewelry repair, and fine mechanical work.

Technical Specifications

File Shapes Included

- Round
- Flat
- Half-round
- Square
- Triangular

Compatible Materials

Hardened Steel, Ceramics, Glass

Design & Ergonomics

Handle Features

Comfortable Grip • Color-coded

Applications

Primary Applications

- Model making
- Jewelry repair
- Fine mechanical work
- Deburring
- Sharpening
