

Precision Electric Die Grinder

This precision electric mill is designed for detailed work, featuring a variable speed control for optimal performance across different materials. Its compact and ergonomic design ensures comfortable handling and precise control during operation.

Overview

Precision Performance

This precision electric die grinder is engineered for versatile surface grinding and polishing applications. With a robust 200W motor and variable speed control ranging from 8500 to 22000 r/min, it offers the adaptability required for professional metal, wood, and stone finishing. The ergonomic design ensures consistent handling for detailed, high-precision tasks.

Technical Specifications

Power Input	200 W
No Load Speed Range	8500-22000 r/min
Chuck Capacity	2.5-6.35 mm
Power Supply Cord Length	2.8 m

Applications

Primary Uses

- Surface Grinding
- Polishing

Suitable Materials	Metal, Wood, Stone
--------------------	--------------------
