

Precision Material Cutting Machine Tool

This machine-tool is designed for cutting various materials with precision and control. Adjustable settings allow for versatile cutting applications.

Overview

Precision Material Cutting Performance

This precision material cutting machine tool is engineered for reliability and control in demanding work environments. Featuring a robust motor and a sturdy base plate, it ensures stability during operation. The ergonomic handle design minimizes fatigue, while adjustable settings provide the versatility needed for various cutting applications.

Technical Specifications

Primary Application

PVC Cutting

Model Number	M1Q-GW-100A
Power Supply	230V-50Hz
Rated Power	350 W
No-Load Speed	3000 RPM

Key Features

Key Features

- Robust motor for consistent performance
- Sturdy base plate for enhanced stability
- Ergonomic handle for comfortable operation
- Adjustable settings for versatile cutting
