

Precision Metering Pump for Chemical Dosing

This precision metering pump is designed for accurate and reliable chemical dosing in liquid and gas applications. It features adjustable flow rate and a compact design for easy integration into existing systems.

Product Overview

Precision Metering Pump

This precision metering pump is engineered for accurate and reliable chemical dosing across both liquid and gas applications. Its robust, compact design ensures seamless integration into existing industrial systems, making it an ideal choice for water treatment, chemical processing, and automation environments. The unit features an adjustable flow rate, providing the flexibility needed for demanding industrial tasks.

Technical Specifications

Construction Features

- Robust yellow-painted finish
- Compact form factor
- Adjustable flow control

Compatible Media

Liquid • Gas

Suitable Applications

Water Treatment, Chemical Processing, Industrial Automation
