Overview

Precision Outside Micrometer

This high-precision outside micrometer is engineered for accurate measurement of external dimensions in machining, engineering, and quality control applications. Constructed with a durable Gcr15 steel and cast iron frame, it ensures reliable and repeatable measurements. The tool features clear scale markings for easy reading and is available in multiple measurement ranges to suit diverse workpiece sizes.

Technical Specifications

Accuracy	0.01 mm
Available Ranges	0-25mm, 25-50mm, 50-75mm, 75-100mm

Materials & Construction

Material Composition	Gcr15 steel and cast iron
----------------------	---------------------------

Logistics & Ordering

Custom Logo MOQ	100
Production Time	35-45 days
Packaging	Plastic Box
Sample Availability	Yes
