

Precision Super Abrasives for Grinding and Polishing

These precision super abrasives are engineered for grinding, cutting, polishing, and finishing a wide range of materials. The abrasives deliver superior material removal rates, tight tolerances, and exceptional surface finishes.

Product Overview

High-Performance Industrial Abrasives

These precision super abrasives are engineered for demanding industrial applications including grinding, cutting, and polishing. Designed for high durability and consistency, they offer superior material removal rates and the ability to achieve tight tolerances on complex surfaces. The range is suitable for high-precision sectors such as aerospace, automotive, electronics, and medical device manufacturing.

Abrasive Materials

Diamond, CBN (Cubic Boron Nitride)

Technical Specifications

Target Industries

- Automotive
- Aerospace
- Electronics
- Medical Device Manufacturing

Core Capabilities

Grinding • Cutting • Polishing • Finishing
