

Precision Tribrach Adapter for GPS Surveying

Precision tribrach adapter designed for GPS surveying equipment. It features three leveling screws for stable positioning and a central threaded mount for secure instrument attachment.

Overview

Precision Tribrach Adapter

This precision tribrach adapter is engineered specifically for GPS surveying equipment, ensuring reliable stability in the field. It features a robust, circular black body construction designed to withstand demanding surveying environments. With three integrated leveling screws, it allows for precise instrument alignment and secure mounting of GPS receivers and related surveying tools.

Technical Specifications

Construction Type	Circular body
Adjustment Mechanism	3-screw leveling system
Mounting Interface	Central threaded mount

Application

Primary Use

Surveying • Alignment • Stability

Compatible Equipment	GPS Receivers, Surveying Instruments
