

## Pressurized Steam Cleaning System

This pressurized steam cleaning system uses high-temperature steam to remove dirt and grime from various surfaces. It features a large water tank for extended use and includes multiple attachments for different cleaning tasks.

### ADDITIONAL IMAGES

### Product Overview

Versatile household appliance for deep cleaning without chemicals.

### Versatile Steam Cleaning System

This high-performance steam cleaner is designed for efficient, chemical-free sanitization across a variety of household and professional surfaces. Featuring a compact, mobile canister design, it utilizes pressurized steam to effectively lift dirt, grime, and bacteria from floors, tiles, and upholstery. Its balanced construction with a 1900ml tank capacity allows for extended, continuous cleaning sessions.

## Technical Specifications

### Performance Metrics

**1500 W**

Power Rating

**1900 ml**

Max Tank Capacity

**35 g/min**

Steam Capacity

**4 Bar**

Max Pressure

### Operational Data

Feature	Specification
Heating Time	Approx. 10 minutes
Continuous Spray	38 minutes
Cord Length	3.0 meters
Boiler Material	Aluminium or Stainless steel

### Voltage Compatibility

AC220-240V/50Hz, AC110-120V/60Hz

## Construction

Portable canister design for easy room-to-room maneuverability.

### Housing Material

ABS

### Safety & Indicators

Yes
