

Professional Audio Mixer Console

This professional audio mixer console is designed for versatile sound control and signal processing. It features multiple input channels with individual gain, EQ, and pan controls, along with faders for precise level adjustments and comprehensive metering for monitoring signal levels.

Overview

Professional Audio Mixing Console

This professional audio mixer console is engineered for versatile sound control and signal processing in live performances, studio recording, and broadcast applications. It features high-quality components, including Japanese ALPS 100mm stroke slide potentiometers and built-in digital effects chips, ensuring durability and professional-grade audio fidelity. With comprehensive input/output options and integrated equalization, this console provides a complete solution for managing complex audio setups.

Hardware & Build

Fader Type	Japanese ALPS 100mm stroke slide potentiometer
Power Supply	Environment-preserved, high-efficiency noise-interference-free switch

Audio Processing

Built-in Effector	YAMAHA YSS series digital chips
Graphic Equalizer	7 bands

Connectivity

Output Interfaces

- Stereo Mixing (ST) Output
- GROUP 1/2 Outputs
- AUX Outputs
- REC OUT
- Phones Jack (Monitoring)

Input Interfaces	XLR Mic Input, TRS Phone Line Balance Input, TAPE IN, Phantom Power Support
External Effects	Yes

Features

Special Functions

Ultra Heavy Woof Signal • Phantom Power • Low Noise Design
