

Professional Pruning Shear with High-Carbon Steel Blades

This professional pruning shear is designed for efficient and precise cutting in gardening and landscaping. It features high-carbon steel blades for durability and sharpness, ergonomic handles for comfortable grip, and a sap groove to prevent sticking.

Product Overview

Professional Performance Gardening Shear

This professional-grade pruning shear is engineered for high-frequency continuous use in demanding landscaping and gardening environments. Featuring premium Japanese SK5 high-carbon steel blades, it offers exceptional precision, durability, and sharpness. The ergonomic aluminium handle with orange PVC coating ensures operator comfort and safety during extended work sessions.

Technical Specifications

Recommended Cutting Diameter

15 mm

Maximum Cutting Capacity

Blade Material	Japanese SK5 high-carbon steel
Handle Construction	Aluminium with orange PVC coating

Features

Key Features

- Ergonomic handle design for reduced hand fatigue
- Precision blade and counterblade adjustment system
- Integrated shock absorbers and buffers
- Sap groove to prevent blade sticking
- Safety locking mechanism
