

PTC Electric Space Heater with Oscillation

This electric space heater provides 1000W or 2000W of heating power. It offers cool, warm, and hot air selection with a 90-degree oscillation feature and adjustable thermostat control.

Product Overview

Efficient PTC Heating Technology

This PTC Electric Space Heater is designed for reliable and efficient warmth in personal or small office environments. Utilizing advanced Positive Temperature Coefficient (PTC) heating technology, it ensures safe and consistent heat dissipation. Its compact, stable design makes it an ideal solution for targeted heating needs.

Technical Specifications

Heating Element	PTC (Positive Temperature Coefficient)
Control Method	Rotary Knobs
Oscillation	Yes

Design & Build

Base Stability	Stable Base
Color Scheme	Red, Black
Design Type	Compact
