

PTC Electric Space Heater

This electric heater is part of the PTC series and is designed for space heating in households. It uses PTC (Positive Temperature Coefficient) heating elements to efficiently generate heat safely.

Product Overview

Efficient PTC Space Heating

This PTC Electric Space Heater offers versatile climate control for residential environments. Featuring a slim tower design, it combines safety with efficient heat generation. With multiple operating modes and user-friendly features like oscillation and a timer, it provides reliable supplemental warmth.

Operating Modes

Available Modes

- Cool Wind
- Low Heat
- Medium Heat
- High Heat

Performance & Features

Oscillation Angle	70 degrees
Timer Duration	12 hours
Maintenance	Removable Filter, Easy Cleaning

Interface & Control

Display

Digital Display
