

PVC DWV Double Wye Fitting

This PVC DWV double wye fitting is designed for drainage, waste, and vent applications. Constructed from durable PVC, this fitting provides a smooth interior for efficient flow and resistance to corrosion and chemical degradation.

Product Overview

Professional PVC DWV Double Wye Fitting

The PVC DWV Double Wye fitting is engineered specifically for drainage, waste, and vent (DWV) applications in professional plumbing systems. Constructed from high-quality, durable PVC, this component ensures long-term resistance to corrosion and chemical degradation. It features a smooth interior design to maintain efficient flow, providing a reliable connection for merging multiple drain lines into a single outlet.

Technical Specifications

Pressure Rating

Non-pressure

Material	PVC (Polyvinyl Chloride)
Application	Drainage, Waste, Vent
Number of Connections	4

Performance Features

Key Advantages

- Corrosion resistant
- Chemical degradation resistance
- Smooth interior for high flow efficiency
- Complies with industry DWV standards
