Product Overview

Professional Quarter-Turn Metal Tap

This durable quarter-turn metal tap is engineered for reliable flow control in various industrial and domestic applications. Constructed from high-quality brass with PTFE seals, it ensures long-lasting performance and resistance to wear. It is compatible with water, gas, and oil, featuring a versatile design that includes a hose connector for added convenience.

Technical Specifications

Working Pressure

1.6 Mpa
Max Pressure

Operating Temperature Range	-20 to 100
Size Specification	DN15, DN20
Thread Standard	ISO228

Materials & Construction

Material Composition

Component	Material
Body	High Quality Brass
Stem / Ball	High Quality Brass
Seal	PTFE

Usage & Compatibility

Compatible Media

- Water
- Gas
- Oil
