

Quartz Infrared Space Heater

This portable quartz infrared space heater is designed for personal or small area use. It features multiple quartz heating elements, adjustable thermostat and safety features including tip-over switch and overheat protection.

Product Overview

Efficient Radiant Heating

The Quartz Infrared Space Heater is a portable heating solution designed for personal or small area use. Utilizing multiple quartz heating elements encased in a protective metal grill, it delivers immediate, consistent radiant heat. Its lightweight construction and compact design allow for easy mobility, while essential safety features ensure reliable operation in any environment.
