

Quartz Radiant Space Heater

This space heater uses radiant heat technology for efficient indoor warmth. It features a quartz heating element for rapid heating and multiple power settings for customized comfort.

Overview

Efficient Radiant Heating

This quartz radiant space heater provides efficient and directional warmth through a high-performance quartz heating element. Designed for convenient wall-mounted installation, it offers adjustable head positioning to suit specific area requirements. It is a reliable solution for maintaining consistent temperatures in indoor environments with integrated safety controls.

Technical Specifications

Rated Power Input

1200 W

Maximum Power

Voltage

220-240V~ 50Hz

Features

Installation

Wall mounted

Control

Pull chain

Adjustability

Adjustable head angle (Up & down)

Certifications

Quality Standards

CE, GS, EMC
