

Quick-Release Pipe Coupling

These quick-release couplings facilitate the rapid connection of pipes and hoses. A lever-locking mechanism ensures a secure, leak-proof seal for use with liquids, solids, and gases.

Product Overview

Quick-Release Pipe Coupling

These quick-release couplings are engineered for efficient pipe and hose connections in agricultural, construction, and industrial environments. Featuring a lever-locking system, they allow for rapid connection and disconnection without the need for specialized tools. Designed to provide a secure, leak-proof seal, they are suitable for conveying a wide range of liquids, solids, and gases.

Technical Specifications

Primary Applications

- Irrigation systems
- Slurry handling
- Pneumatic conveying

Design Features

Tool-free operation • Leak-proof • Corrosion resistant

Connection Mechanism

Lever-locking system

Material Composition

Galvanized Steel, Stainless Steel
