

# QWERTY Feature Phone with 2.0MP Camera

This mobile phone features a QWERTY keyboard and a 2.0-megapixel camera. The device has a color display, dedicated function keys, and supports standard mobile network connectivity.

## Overview

### Reliable QWERTY Feature Phone

This compact feature phone combines a tactile QWERTY keyboard with essential modern connectivity, making it a reliable tool for professional communication. Built on a mature WCDMA 3G solution with a Qualcomm MSM6290 chip, it ensures stable and high-speed internet performance. The device supports a wide range of multimedia formats and includes dual cameras, offering a balanced blend of functionality and ease of use for everyday business tasks.
