

R134a Single-Phase Refrigerant Compressor

Single-phase hermetic compressor designed for refrigeration applications. It operates on 220-240V at 50/60Hz and is thermally protected.

Product Overview

High-Efficiency Hermetic Compressor

This single-phase hermetic compressor is engineered for reliability in demanding refrigeration environments. Featuring a compact design and low voltage start-up capability, it operates efficiently while maintaining low noise levels. It is specifically compatible with R134a refrigerant, making it an ideal choice for professional cooling equipment.

Technical Specifications

Refrigerant Compatibility	R134a
Power Requirements	220-240V ~ 50/60Hz
Motor Phase	Single-Phase
Safety Features	Thermally Protected

Performance & Certification

Compliance
CE • RoHS

Application Range

Compatible Equipment

- Household Refrigerator/Freezer
- Water Dispenser
- Wine Cabinet
- Medical Cabinet

Key Advantages

Operational Benefits

1 Compact
Design

1 Low
Noise Output

1 High
Reliability
