

Rack Mountable Modem for Data Transmission

This rack-mountable modem is designed for network connectivity and data transmission. It features a front panel with an LCD screen, navigation buttons, and indicator LEDs, making it suitable for professional or industrial applications.

Product Overview

Professional Data Transmission

The JTR-1 is a robust, rack-mountable modem engineered for reliable data transmission in professional and industrial network environments. Designed for seamless integration into existing server infrastructure, this device features an intuitive front panel interface including an LCD display, navigation controls, and status indicator LEDs for real-time monitoring. It provides a dependable solution for organizations requiring consistent connectivity and efficient network management.

Technical Details

Model Number	JTR-1
Serial Number Format	8522910000000055-4

Key Features

Interface Capabilities

- LCD Display Panel
- Navigation Buttons
- Status Indicator LEDs

Mounting Type

Rack Mountable

Application Suitability	Professional, Industrial, Network Connectivity
