

Radial Drilling Machine for Metalworking

This heavy-duty radial drilling machine is designed for precision in metalworking. It features a robust build with a large work table, a powerful motor, and adjustable spindle speeds.

Overview

Industrial Radial Drilling Machine

This heavy-duty radial drilling machine is engineered for precision metalworking operations, offering robust construction suitable for demanding industrial environments. It features a large work table capable of accommodating various workpiece sizes and is equipped with a high-performance motor designed for efficient drilling and tapping. With adjustable spindle speeds, flexible feed rates, and a versatile radial arm for optimal drill head positioning, this machine ensures high accuracy and reliability for diverse material processing needs.

Technical Specifications

Model Designation	Z3050x16/1
Key Features	Heavy-duty construction, Precision drilling, Tapping capability, Adjustable spindle speeds, Flexible radial arm

Safety & Compliance

Safety Systems

- Emergency stop
- Overload protection
