Product Overview

High-Performance Spherical Bearing

The GE70ES-2RS is a high-quality radial spherical plain bearing engineered for demanding industrial environments. Featuring a robust steel-on-steel sliding contact surface, it delivers exceptional load-carrying capacity and durability. Designed with integrated seals on both sides, it effectively prevents contamination and retains essential lubricants, ensuring reliable performance in heavy-duty applications.

Technical Specifications

Sealing

2RS (Sealed on both sides)

Bearing Type

Radial Spherical Plain Bearing

Sliding Contact Surface

Steel-on-steel

Angular Misalignment

Yes

Application Suitability

Recommended Applications

- Hydraulic cylinders
- Agricultural machinery
- Construction equipment
- Industrial machinery

Operational Modes

Oscillating movements, Rotating movements, Heavy loads
