

Radiant Electric Heater for Wall or Ceiling Mount

This electric heater is designed for household use. It uses radiant heat technology and is suitable for wall or ceiling mounting.

Overview

Radiant Heating Solution

The QH-600H is an efficient electric heater designed specifically for wall or ceiling mounting, making it an excellent space-saving solution for various environments. Utilizing advanced radiant heat technology, it provides immediate, focused warmth through its dual heating elements. Its clean, white, elongated housing with rounded edges ensures a modern and unobtrusive appearance suitable for professional or household settings.
