

Radiant Space Heater with Adjustable Stand

This space heating apparatus is designed for indoor use, providing warmth through radiant heat. It features a circular heating element protected by a metal grille, mounted on an adjustable stand for optimal positioning.

Product Overview

Efficiency Meets Versatility

This radiant space heater is engineered for consistent indoor warmth, utilizing an efficient circular heating element protected by a robust metal grille. The integrated adjustable stand allows for precise positioning to direct heat exactly where it is needed most. With an intuitive base-mounted control panel, users can easily manage power and heat output for customized comfort in any professional setting.
