

Radio Antennas with BNC Connectors

These radio antennas are designed for handheld radios and communication devices. They feature BNC connectors and come in both rigid and flexible designs.

Product Overview

Professional Radio Antenna Solutions

These high-quality radio antennas are engineered to provide reliable signal transmission and reception for communication devices. Featuring standard BNC connectors, they ensure broad compatibility with a wide range of radio equipment. The collection includes various models, offering both rigid and flexible designs to suit diverse operational environments and frequency requirements.

Technical Specifications

Connector Type	BNC
Model Series	JBA-813, JBA-814, JBA-815, JBA-816, JBA-817, JBA-818, JBA-819

Design & Build

Antenna Styles

- Rigid models
- Flexible models

Equipment Compatibility

Handheld Radios • Communication Devices
