

Rapid Auto Start Battery Charger

This is a multi-function DC power unit designed for automotive applications. The charger offers rapid auto start capabilities for quick battery charging.

Product Overview

Professional Grade Rapid Battery Charging

The Rapid Auto Start Battery Charger is a versatile multi-function DC power unit engineered specifically for demanding automotive environments. Designed for efficiency, it provides rapid start capabilities to quickly revive batteries and get vehicles back on the road. Its robust, mobile construction makes it an essential tool for professional auto repair shops and service centers requiring reliable power delivery.

Key Performance Metrics

Performance Highlights

12 V

Voltage Output

24 V

Voltage Output

Technical Specifications

Integrated Meters

- Voltage Meter
- Current Meter

Selectable Voltage	+12V, +24V
--------------------	------------

Current Adjustment	Adjustable current settings for precise charging control
--------------------	--

Design & Mobility

Build Quality

Robust Construction • Portable Design • Mobile Unit

Maneuverability	Equipped with wheels for easy transport across workshop floors
-----------------	--

Application

Recommended Environment

- Auto Repair Shops
- Vehicle Service Centers
- Automotive Maintenance Facilities

Core Capability	Rapid auto start for quick battery recovery
-----------------	---
