

RCA Audio/Video Cable

This is a high-quality audio/video cable for transmitting analog signals. It features a durable black jacket and a standard RCA connector with a center pin for signal transmission.

Product Overview

High-Quality Analog Signal Transmission

This RCA Audio/Video cable is engineered for reliable analog signal transmission between a variety of audio and video devices. Featuring a durable black jacket and a standard RCA connector with a precision center pin, it ensures optimal performance and stable connectivity. The specialized green-colored connector makes it ideal for specific functions within component video (YPbPr) setups, providing clear and consistent output for professional or home environments.

Technical Specifications

Signal Type

Analog Audio • Analog Video

Connector Type

Standard RCA

Primary Application

Component Video (YPbPr)

Physical Construction

Build Features

- Durable outer jacket
- Center pin for signal transmission
- Standardized RCA interface

Jacket Color

Black

Connector Color Coding

Green

Compatibility

Compatible Devices

Audio Players, Video Players, Displays, Receivers
