Product Overview

Detailed overview of the device's 16 core functions, including GPS/Beidou localization and biometric verification.

Advanced Security Patrol Management

This electronic guard tour system is designed to provide effective control and surveillance for security personnel, maintenance teams, and facility management. It features robust, real-time tracking capabilities including GPS and Beidou dual-mode localization, ensuring precise monitoring of patrol routes and schedules. With integrated biometric authentication and 4G connectivity, the system offers immediate data transmission, remote management, and enhanced operational accountability.

Technical Specifications

Ingress Protection

IP67 • Waterproof • Dustproof

Core Features

- GPS + Beidou dual-mode localization
- Live fingerprint identification
- 4G HD voice call capability
- Remote data download and update
- Impact detection
- Man-down alarm
- Pedometer
- SOS emergency alert

Battery Capacity

3400 mAh

Connectivity & Operation

Authentication Modes

- Close
- Once Verify
- Multiple Verify

Communication

4G, GPS, Beidou, Real-time Data Upload
