

Rearview Mirror Adjustment Switch

This rearview mirror adjustment switch allows precise control of vehicle side mirrors. It features a multi-directional control pad and a separate selector switch for left and right mirrors.

Product Overview

Precision Mirror Control

This rearview mirror adjustment switch is engineered to provide precise, multi-directional control for heavy-duty vehicle mirrors. Designed for seamless integration into trucks and buses, it allows drivers to easily adjust side mirrors to optimize visibility and safety. The unit features a durable build and is now available in advanced flame-retardant material configurations.
