

# Recessed LED Downlight with Aluminum Heat Sink

This recessed LED downlight is designed for indoor lighting applications. It features a cylindrical aluminum heat sink with vertical fins for thermal management and spring-loaded mounting for easy installation.

## Product Overview

### High-Performance Recessed Lighting

This recessed LED downlight is engineered for professional indoor lighting applications where thermal efficiency is paramount. Featuring a robust cylindrical aluminum heat sink with vertical fins, the design ensures superior heat dissipation for extended operational life. The unit includes a spring-loaded mounting mechanism, allowing for quick and secure installation into standard ceiling fixtures.

## Technical Specifications

Mounting Style	Recessed
Construction Material	Aluminum
Thermal Design	Aluminum Heat Sink, Vertical Fins, Efficient Heat Dissipation

## Installation

### Installation Features

- Spring-loaded mounting mechanism
- Easy ceiling integration
- Integrated power cable
