

Recessed LED Downlight with Spring Clips

This recessed LED downlight features a circular white frame and an integrated light diffuser. It is equipped with orange spring clips for secure mounting and a heat sink designed with vertical fins for efficient thermal management.

Product Overview

Professional Recessed LED Downlight

This recessed LED downlight is engineered for efficient general illumination in commercial and hospitality environments, such as hotels and modern buildings. Featuring a durable design with integrated thermal management fins and secure spring clips, it ensures reliable performance and easy installation. The unit offers excellent resistance to frequent switching and provides consistent light output, making it a versatile choice for professional lighting projects.
