

Recessed Wall-Mounted Access Panel with Key Lock

This recessed access panel allows for secure access to essential utilities. It features a hinged door with a key lock for added security.

Product Overview

Secure Utility Access Solution

This recessed wall-mounted access panel provides a clean, professional solution for concealing utility connections while maintaining ease of maintenance. Designed for flush installation, it ensures a seamless aesthetic integration with the surrounding wall surface. The unit is equipped with an integrated key-lock mechanism to prevent unauthorized access and protect critical infrastructure components.

Technical Specifications
